

Breathe Safe and Easy

High Concentration Ion Distribution Systems

Needlepoint Bipolar Ionization (NPBI) and How It Works:

NPBI Has been proven to be effective against: Coronavirus, Norovirus, MRSA, Listeria, C-Diff, SARS, Strep, Legionella, E. Coli, and Swine Flu. NPBI is effective against VOCs, Odors, Mold, Mildew; and causes the agglomeration of airborne contaminants like particulate or molecules, aiding filtration capture or causing them to drop out of breathing areas sooner by increasing their mass.

Perfect for Public Areas:

Offices, Lobby Spaces, Libraries, Museums, Restaurants, Hotels, Dining areas, Educational facilities, Senior Living, Workout Rooms or Gyms, Locker rooms, Public Transit Spaces, Elevators, Indoor Grow Operations. Anyplace where people may congregate, visit or travel through.

Locate Close To Sources of Pathogens:

Simple to install, these plug and play solutions, have a patented dispersion method maximizing ion concentration where they are installed. They require **no modification** of existing air handling systems. **No contractors to pay**. Mount on a wall or ceiling or place it on a shelf and plug it into a standard wall outlet.

**Bipolar Ionization
Deactivates
Pathogens,
Reduces Odors and
Airborne
Contaminants
In Places Where
Human Interactions
Occur**

NPBI Studies Show the Following Efficiencies Against Concerning Pathogens:

Tuberculosis 69.09%, Norovirus 93.50%, MRSA 96.24%, Staphylococcus 96.24%, Mold Spores 99.50%, E.coli 99.69%

Coronavirus (COVID-19) 99% Airborne and 80% on Surfaces in 10 Minutes...

**High Concentration Ion Distribution Systems With
 Needlepoint Bipolar Ionization Products Are Readily Available**

UL2998 & UL867 Certified Ionizers
