

IDEAL PRO

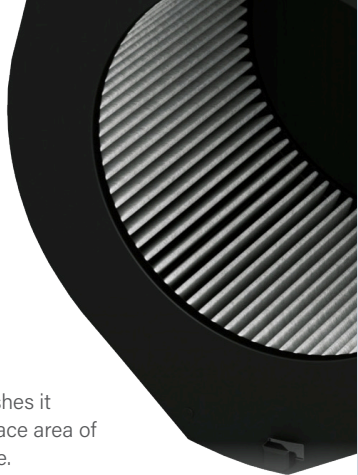

AIR PURIFIERS

Made in
Germany.

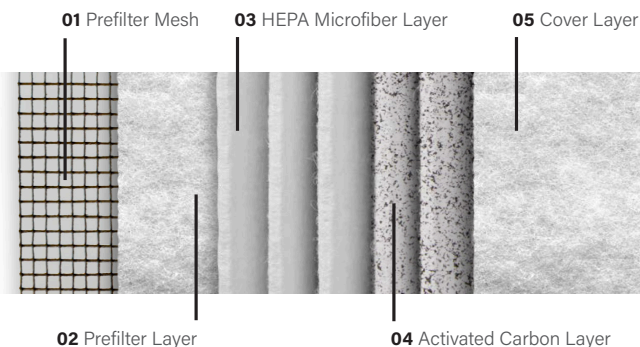

360° smart filter technology.

Reliable and effective.

Our filter technology takes the air in and pushes it through a unique cartridge which has a surface area of 16 square feet of accordion-style filters inside.

The 360° smart filter has five layers for cleaning performance. These layers also help remove dust, debris, and kitchen odors. The circular design ensures optimum utilization of the filter surface. Our specially developed HEPA filters with multi-stage filtration technology remove airborne debris from your indoor air. This HEPA layer component is critical in capturing the smallest particulate matter.

As quiet as a whisper.

Shh... Can you hear that?

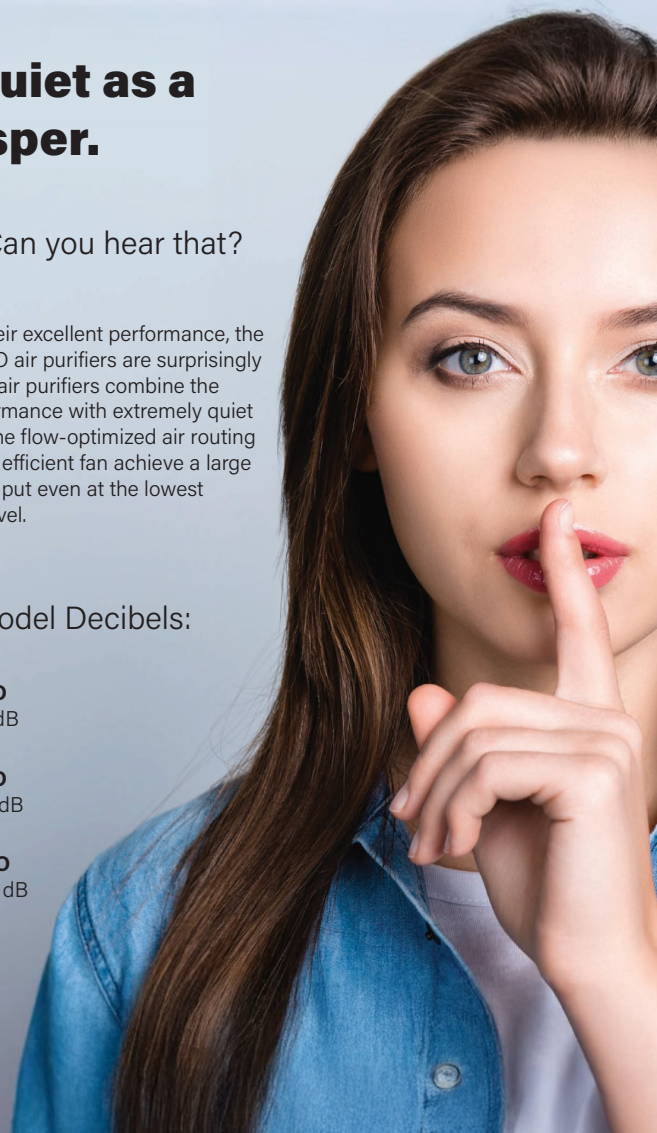

Despite their excellent performance, the IDEAL PRO air purifiers are surprisingly quiet. Our air purifiers combine the best performance with extremely quiet running. The flow-optimized air routing and highly efficient fan achieve a large air throughput even at the lowest filtration level.
