MOLEKULE

PECOAir+ purifier

Moonlight | Desert | Fog

Science-backed pollutant destruction with deeper insights

Discover a more complete picture of home air health. HEPA filtration combined with PECO technology protects you from a wider range of pollutants than traditional purifiers. AI-powered insights from advanced sensor data show you the proof in the app.

PECO technology destroys the widest range of pollutants compared to conventional air purifiers.

Formaldehyde
tobacco smoke

DNA viruses
throughout nature

Black mold
bathrooms, window frames, inside pillows

Pet dander
carpets, floors

D-limonene
citrus-scented cleaners

Bacterial spores
spoiled food, bathrooms, kitchens

SARS-CoV-2
severe acute respiratory syndrome coronavirus 2

Pollen
windows, doors, carpets

Staphylococcus
skin, mucous membranes, soil

Benzene
detergent

Dust mite allergens
mattresses, blankets, pillows

Ethyl acetate
nail polish remover

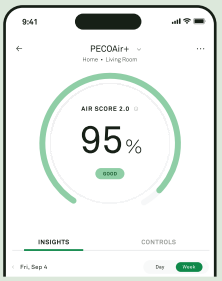

Cockroach allergens
trash cans, cupboards, cabinets

Acetone
varnish off-gassing

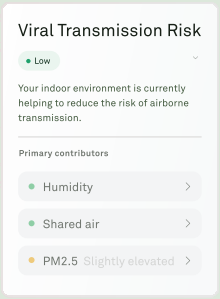

Scientifically *better* air™

App-controlled air health

View live pollutant readings, historic air data, and control all your Molekule devices right from the palm of your hand.

Air Agent assistant

From tips based on pollutant readings to risk assessments of your air's susceptibility for mold and viruses, Air Agent empowers you to breathe better.

NearSilent™ operation

High clean air delivery rates make a big difference. Low noise levels make sure that difference is felt more than it's heard.

MOLEKULE

PECOAir+ purifier

THE PECO DIFFERENCE

A more *destructive* purification.

PECO technology uses a proprietary nanocatalyst to destroy pollutants at the molecular level.

UV-A light energizes the catalyst, initiating a chemical reaction that generates hydroxyl radicals.

These highly reactive free radicals break down airborne organic pollutants—including VOCs, viruses, bacteria, mold, allergens, and odors—leaving behind harmless trace elements like carbon dioxide and water vapor.

The result? Scientifically *better* air.

Specifications

Room size coverage
Up to 875 sq ft (81.29 m²)

Automated modes
Auto Protect: Standard and Quiet

Fan speeds
5 manual speeds, Deep Clean (app only)

Sound levels
Lowest speed — 29 dBA
Highest speed — 55 dBA

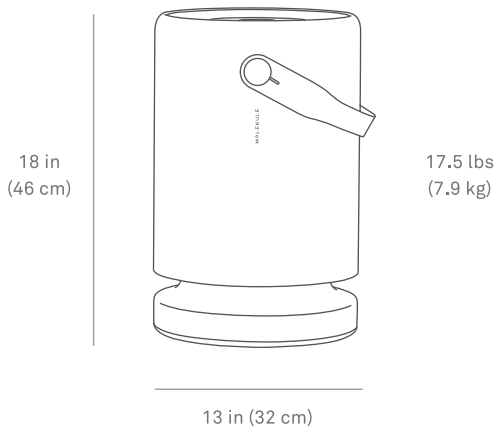

Sensors
Particulate Matter (PM1.0–10), Rh/T, Dual TVOC, True CO2

Control
LCD color touch display and app

App-enabled
iOS and Android

WiFi-enabled
2.4 GHz and 5 GHz

Included filter
2× PECO-HEPA Advanced filters — recommended replacement every six months

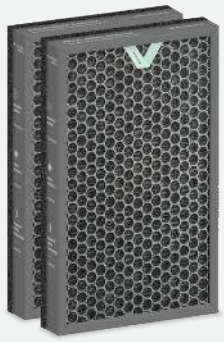

Cord length
72 in (183 cm)

Handle material
Vegan leather

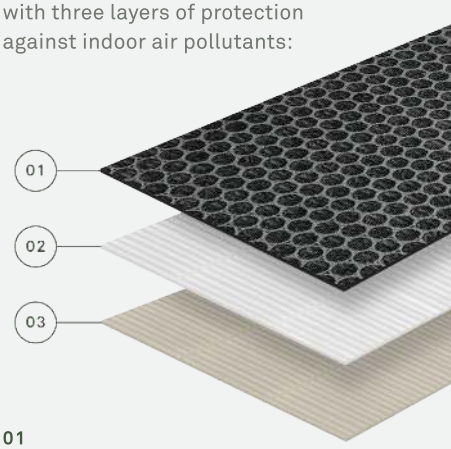

FDA Clearance
510(k) Class II: Cleared for medical use to destroy bacteria, viruses and mold, and collect particles

Warranty
2-year limited

PECO-HEPA Advanced purification

PECOAir+ uses two filters, each with three layers of protection against indoor air pollutants:

01

Activated carbon is the first line of defense, adsorbing odors and VOCs.

02

HEPA filtration captures more than 99.97% of fine particles down to 0.3 microns in size, including dust, dander, and pollen.

03

PECO technology breaks down organic pollutants, including viruses, bacteria, allergens, mold, and gases, that manage to pass through the first two layers.

MSRP $599
