

AirTube Series

Perfectly Portable Air Purification Solutions

The AirTube series has all the filtration power of a serious air cleaner, the convenience of a portable unit and a completely compact size. It is the ideal companion for the frequent traveler, or for use on desktops and small spaces measuring up to 100 square feet.

The AirTube series features two lightweight options that allow you to breathe clean air, wherever you go. As such, these compact air purifiers are also a popular choice for allergy and asthma sufferers, for whom filtration of airborne particles, chemicals and odors is a must—no matter the location.

■ Customizable Features

Activated Carbon Blend

Exec Blend: Our Exec carbon is our general-purpose blend, ideal for trapping a wide range of airborne chemicals, gases and odors.

Vocarb Blend: Our Vocarb carbon is our boosted blend, offering a more aggressive removal of hard-to-trap airborne chemicals, gases and odors. This blend is best suited for newly renovated environments, unknown contaminants and/or formaldehyde.

Custom Blend: Have an unusual IAQ problem? Let us customize the perfect carbon blend solution!

Filter Depth

A unit's filter depth is key to its adsorption capacity. Customize your unit with a 2" (regular) or 3" (deep or "D") carbon bed filter to maximize its chemical-adsorption efficiency.

■ Optional Features

Virus, Mold & Bacteria Protection

Customize your air purifier with a UV light* to provide additional protection from viruses, mold and bacteria.

Available Colors
