## 7500 SYSTEM

Installs easily with two 8" diameter outflow connections and one 14" diameter intake connection. Right and left side knock-outs provide versatility for installation. End door removes for easy filter maintenance. Dual HEPA cartridge design allows for enhanced performance.

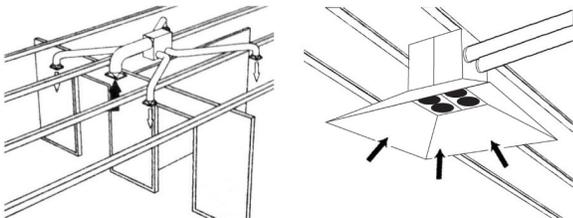

## 10000 SYSTEM

The largest capacity model in the Amaircare® line! The Tri-HEPA design provides ample collection of airborne particulate, biologicals and VOCs. Three individual filter modules employ 3-stage filtration and are easy to maintain through the removable end panel door.

Third stage VOC canister upgrade available for both systems.

The 7500 and 10000 systems can be installed with existing air handling equipment or as independent, stand-alone units
