

Aura Air Mini

The perfect on-the-go solution
for air purification

As proven by:

Clean air, everywhere

To help people live healthier lives, Aura Air developed the world's leading air management device, protecting you wherever you go.

The Aura Air Mini is a portable air purifier that provides effective protection from harmful air pollutants using the Sterionizer™ ionization technology, scientifically proven effectiveness by Innovative Bioanalysis in California.

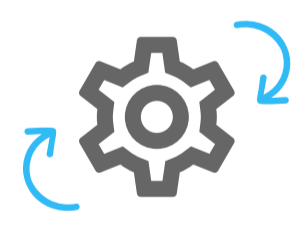

The system releases positive and negative ions to freshen up your indoor space and captures large particles, including dust, pollen, insects, animal hair, and more while generating 0 Ozone emissions.

99.9% Effectiveness

The device supplies an effective buffer between you and the dangerous air particles around you. Breathing is not a choice - but breathing clean air is.

Why Aura Air Mini?

Zero Maintenance

Does not require replacement filters, has a shelf life of 3 years.

Small But Powerful

Purifies air in rooms up to 107 ft².

Strong Battery

lasts 5-6 hours and recharges via USB-C cable.

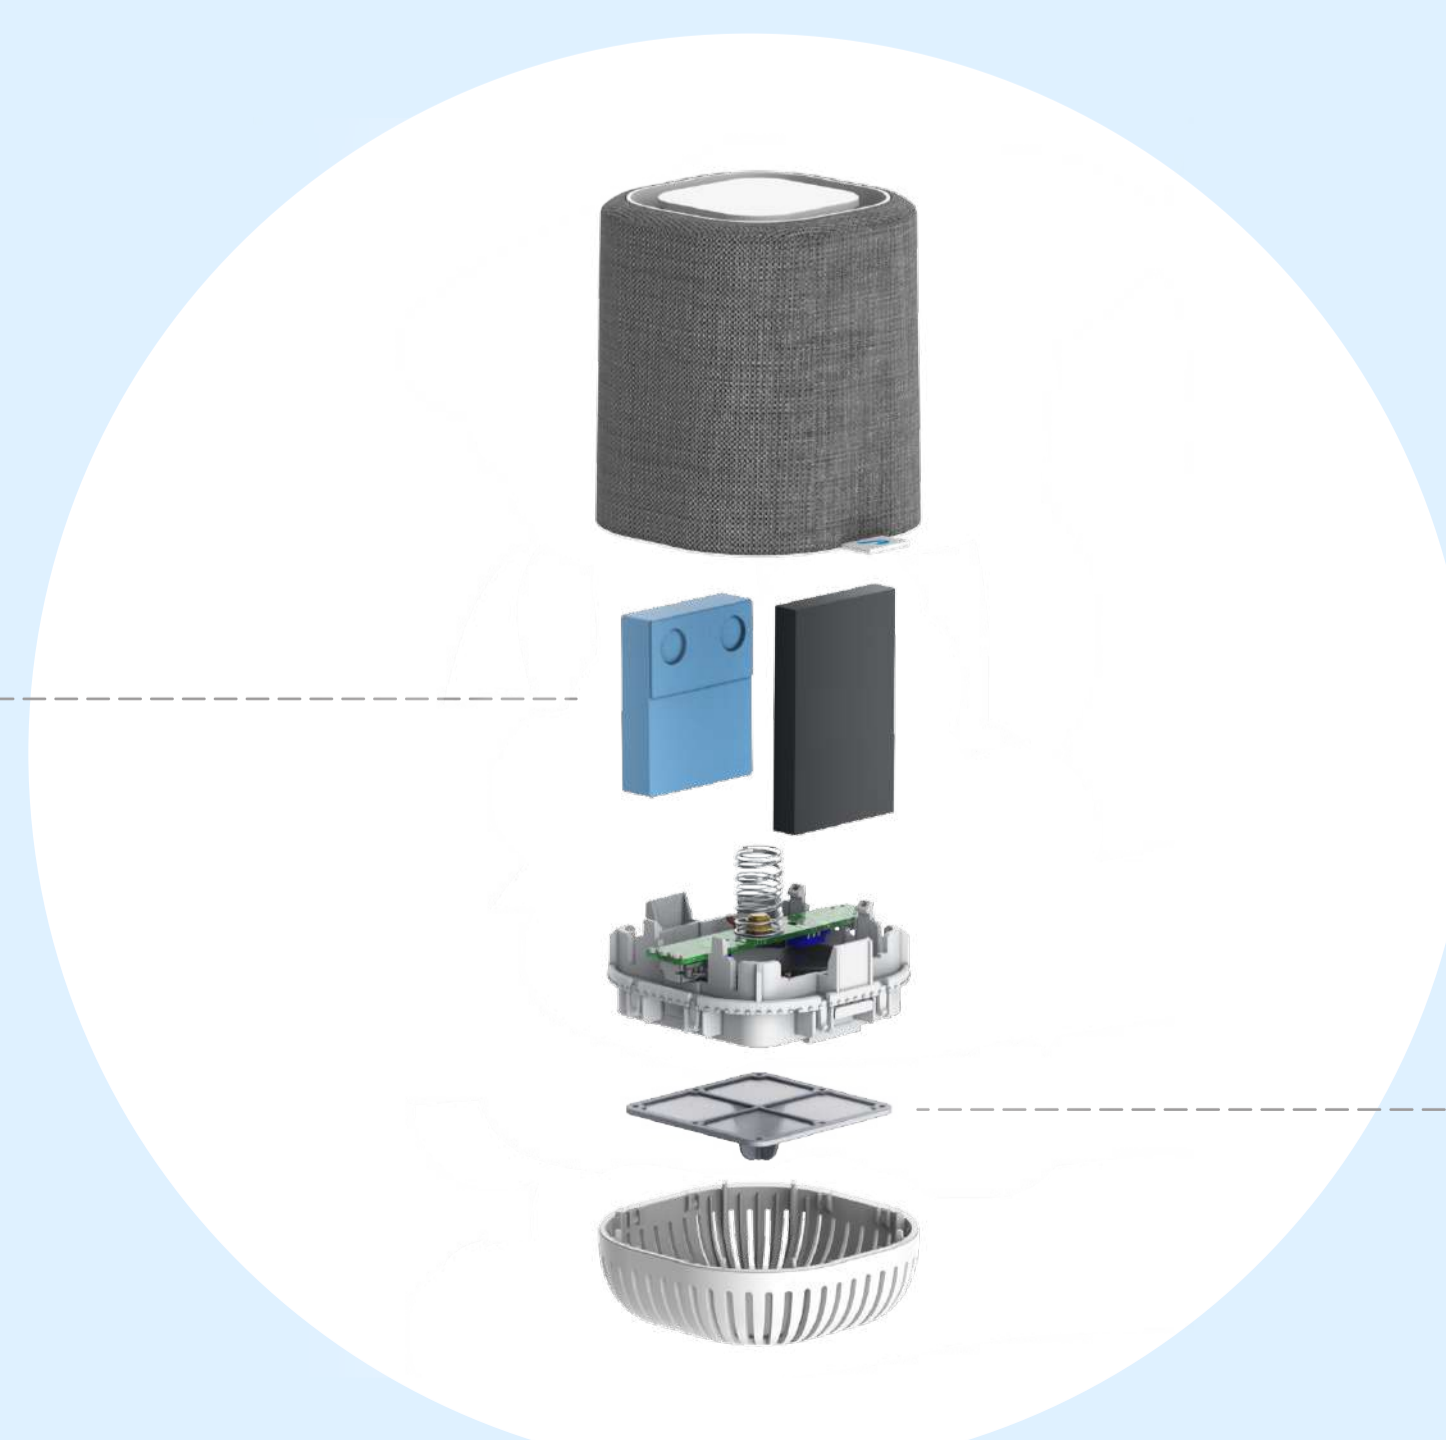

Compact

Easily fits into (almost) any bag.

Innovative Technology at Your Fingertips

Pre-filter:

Filters large particles of dust, pollen, insects, animal hair, and other large particles.

Sterionizer™:

Sterionizer disinfection technique that sends positive and negative ions into the air where they react with water molecules to form hydroxide (OH) and hydrogen peroxide (H₂O₂) particles that help break down pollutants from VOCs, smoke, mold, and virus germs.
