

Your first step to clean air

Protect your loved ones from allergens and toxins. Work in peace and breathe with ease knowing the air around you is safe and healthy with uHoo - the world's most advanced indoor air sensor.

What affects your air?

The air we breathe indoors can be up to five times worse than outdoors. Unvented cooking, harmful appliances, your car idle in the garage, and even the number of people inside a room greatly affect the quality of our indoor air.

Know what you breathe

Create a healthier home and develop better habits

- Monitor each room in your home
- Get alerts and customize notifications
- Understand how your habits affect your air and your health
- Control your purifier, thermostat, ventilation and other smart appliances via IFTTT
